Do you have any information on it? Did it ever get raced? We do not have any information on the car at this time. It was a 1970 Mustang Pace Car used in Parnelli Jones' 1970 American Endurance Championship race. The car was in a private collection for many years. It was offered for sale a few times over the past 10 years by various individuals. "If you could look back on your life and change one thing, what would that one thing be? But, how would you go about doing that?" "Knowledge is knowing a tomato is a fruit. Wisdom is not putting it in a fruit salad." Re: 1970 Mustang Pro-Am Pace Car Camaro? it was a 1970 Mustang Pace Car used in Parnelli Jones' 1970 American Endurance Championship race. Yea, I remember reading that...when I was a kid I thought the entire Parnelli Jones racing background was the idiot boys battling

The Mandesha rushed up to her parents as they were walking by, but was caught before. Outgoing Rep. Mark Meadows, R-N.C., has called on his fellow Republicans to stop publicly defying President Donald Trump. "We've got some morons that are running the House," Meadows told Fox News' "Fox & Friends" on Friday, noting that there are some Republicans who have refused to work with Trump. "Let's not do that anymore." He said GOP lawmakers shouldn't signal their differences in public. "Let's not publicly gloat about this,"

Meadows said. "Let's act together as a team." Meadows last week called for House Democrats to "disarm" and "unrig the election" against Trump. Meadows also said in a statement that Trump's "confrontational style" has led to a "lack of cooperation" with the West Wing. Later, in an appearance on MSNBC's "Morning Joe," Meadows said he would consider backing Trump's impeachment if the president shows he isn't going to work with the House. "If the president breaks his promise on infrastructure, if the president breaks his promise on building a wall, if the president breaks his promise to get tax reform passed, if the president doesn't work with us, that's when we have to have the conversation," he said.

Gas-liquid chromatographic determination of methanol in human serum and urine. A rapid method for the determination of methanol in serum and urine is described. The methanol from a serum or urine sample is decomposed in a pressure-balancing reaction tower containing potassium carbonate and methylisobutylketone, and the liberated methanol is then extracted into diethyl ether. The ether is removed and the methanol content is determined by gas-liquid chromatography. Serum and urine concentrations of methanol fall in a dose-dependent manner with

increases in dose from 2,500 to 10,000 mg/kg.
Serum methanol measurements are linear from 0
